Team Player

#PROJECTS

K's Mobile Pet Grooming NJ   **GitHub**
- Created a fully interactive front-end design with a focus on customer experience.
- Worked with the client to ensure all needs were met to their vision.
- Created the website using HTML, SASS, JavaScript

M.U.R.F Discord Bot   **GitHub**
- Created an interactive BOT to help moderate an active Discord server. Complete with commands & a trivia game.
- Interacted with the YouTube API to allow the BOT to play YouTube videos and stream audio.
- Hosted the BOT locally on a Raspberry PI Linux machine using PM3 to guarantee 100% uptime.
- Created the BOT using JavaScript and Discord.js

#EXPERIENCE

CenturyLink
September 2017 - Present : Newark, NJ

- Maintaining and troubleshooting network equipment and customer circuits throughout New Jersey.
- Assembling and testing systems to engineering specifications.
- Interacted with customers to ensure any outages or equipment issues were resolved promptly and to customer/company standards.
- Tested and terminated associated coaxial, CAT5, and single mode fiber optic cable to telecommunication and server equipment and customer hand-off panels to industry standards.
